- Medium density polyethylene is available in 20 and 30 mil.
- Each liner is custom built to your specifications.
- Measured in 10' increments (width must be divisible by 10'.)
- Backed by a twenty-year warranty.

Full installation services are available nationwide for liners too large to ship.

*This size liner will ship FedEx.

PE Liner	Maximum one-piece size	Price
20 mil	40,000 sq. ft.	-
30 mil	26,500 sq. ft.	-

POND LINER ACCESSORIES

TIP

How to calculate what size liner you will need for your water feature.

The basic formula for determining liner size is:
 Length + (Depth x 2) + (Overlap x 2) = Length of Liner
 Width + (Depth x 2) + (Overlap x 2) = Width of Liner

We recommend a 2' overlap on all sides of water feature.

Be sure to measure the longest, widest & deepest points of your water feature to use in the formula in order to ensure the accurate size.

UNIVERSAL REPAIR TAPE

Repairs Polyethylene liners. Simply clean and dry the damaged area and apply the patch. No chemical or activators necessary. Not recommended for splicing liner together.

- Measures 4"

Underlay increases pond liner life and makes liners more puncture resistant by protecting them from sharp objects in the soil. Underlay stabilizes ground under the liner to keep EPDM and other pond liners from over-stretching. Thickness is 6 oz.

NETPAVE GRASS PAVING SYSTEM

- Made from 100% recycled polyethylene
- Connects by lugs and slots

The Netpave Grass Paving System provides an attractive, easy-to-use, durable paving solution for parking areas, pathways and access routes. Netpave can be filled with soil/grass. The cellular structure and open base enables unrestricted root growth. Netpave conforms to irregular surface & gradients and provides ideal source control for sustainable urban drainage.

The Netpave Grass paving System is great for permanent & overspill car parks, drives, walkways, cycle routes, fire & service access roads, helipads, slopes and SUDS.
